

WORKMANSHIP WARRANTY

A workmanship warranty provides clients with coverage against workmanship or installation errors. This type of warranty generally covers about one or two years following the completion of the work.

There is a big difference between a workmanship warranty and a standard manufacturer's warranty. In reality, there is a small likelihood of a roofing material failure. Most times, roofing problems occur due to an installation error. That is why having coverage for workmanship is a must. Of course, working with a reliable and reputable roofer can make all the difference in your experience.
